

Add Custom Content Type as Content Manager

Drupal allows to add custom content types to extend default out-of-box behavior

Click on 'Manage Content Types'.

The page which existing Content Types opens up along with Option to create a new one.

- [Content Management Home](#)
- [Add LINK Content](#)
- [Add SITE COPY Content](#)
- [Add IMAGE Content](#)
- [Add FORM Content](#)
- [Add DOCUMENT Content](#)
- [Add HELP TOPIC Content](#)
- [Add LABEL Content](#)
- [Add ERROR MESSAGE Content](#)
- [Manage Content Types](#)

+ Add content type

Name	Description	Operations
Article	Use <i>articles</i> for time-sensitive content like news, press releases or blog posts.	Manage fields ▾
Basic page	Use <i>basic pages</i> for your static content, such as an 'About us' page.	Manage fields ▾
link	link to another content	Manage fields ▾

Click 'Add Content type' button. It will bring you to form which allows to create a new Content Type.

You can define a new Content Type and click 'Save and Manage Fields' button. That will allow to add custom fields to a new type.

Optum Content Management

✓ The content type *Error Message* has been added.

Tools

- [Content Management Home](#)
- [Add LINK Content](#)
- [Add SITE COPY Content](#)
- [Add IMAGE Content](#)
- [Add FORM Content](#)
- [Add DOCUMENT Content](#)
- [Add HELP TOPIC Content](#)
- [Add LABEL Content](#)
- [Add ERROR MESSAGE Content](#)
- [Manage Content Types](#)

+ Add field

Label	Machine name	Field type	Operations
Body	body	Text (formatted, long, with summary)	Edit ▾

You can click 'Add field' button and add more fields as necessary. Example above creates 'Error Message' type. We can add 'text' field to it. Make sure field has label 'cm_ ..'
